

Problem 1: Greeting

Time Limit: 1 seconds

Memory Limit: 64 MB

Problem Statement

It's Chinese New Year again... Mr. Panda is so tired from greeting his relatives that he has decided to automate this process. But since Mr. Panda does not know how to code he has enlisted you to help code a greeting bot for him.

To greet someone during CNY, we say the person's name, followed by "ni hao, xin nian kuai le!". Refer to sample test cases for more details.

Input Format

The first and only line of input will contain a string S , the person's name.

Output Format

The output should contain the greeting.

Sample Test Cases

Sample Input 1

Xiao Ming

Sample Output 1

Xiao Ming ni hao, xin nian kuai le!

Sample Input 2

Nakano Miku <3

Sample Output 2

Nakano Miku <3 ni hao, xin nian kuai le!

Sample Input 3

Rar the Cat

Sample Output 3

Rar the Cat ni hao, xin nian kuai le!
